

Oracle JET Workshop 2019

Best Practices

- Part 1: Best Practices for Web Component Development
- Part 2: Best Practices for Custom Theme Development

Part 1: Web Component Development

1. Basics of setting up a Web Component.
2. Using the Cookbook as a starting point.
3. Accessing data in and outside a Web Component.
4. Doing minimal work inside the constructor.
5. Shaping data to conform to requirements.
6. Combining multiple JET Components in a Web Component.

Part 2: Theme Development

1. Basics of setting up theme tooling.
2. Understanding structure of theme files.
3. Working with Web Fonts.
4. Sharing a custom theme with Visual Builder
